looking for a QA / PM role

## Work experience

### **Software Analyst** · Katoen Natie · Chișinău

*June 2019 - Present · 6 years 6 months*

#### Responsibilities

- 1) System Support and Issue Resolution:
  - Actively troubleshoot and resolve issues reported by warehouse personnel related to the Warehouse Management System (WMS) and other integrated applications, such as RF Android and Styra.
  - Prioritize and resolve process-blocking incidents promptly to minimize downtime.
  - Coordinate with developers for database changes and perform authorized updates directly in the WMS.
- 2) Incident Management:
  - Analyze, reproduce, and document non-blocking issues for the development team using Microsoft Azure.
  - Prepare detailed incident reports and scenarios to facilitate efficient problem resolution.
- 3) Knowledge Base Development:
  - Create and maintain knowledge articles for recurring issues to support team members and onboard new hires effectively.
  - Monitor and analyze the frequency of recurring issues to identify trends.
- 4) Collaboration and Communication:
  - Serve as a liaison between the warehouse operations team and developers, ensuring clear and efficient communication.
  - Participate in HyperCare and knowledge transfer meetings, acquiring in-depth understanding of new WMS setups.
  - Provide structured feedback and insights to improve processes.
- 5) Process Optimization and Reporting:
  - Generate monthly reports to track recurring issues, highlight trends, and propose proactive solutions.
  - Analyze work volumes and tasks to ensure higher productivity

within an optimized work schedule.

6) Customer Service Excellence:

- Deliver clear and professional communication when resolving incidents, focusing on user-friendly solutions.
- Provide weekend support on a rotational basis, addressing urgent issues to maintain system functionality.
