Full-stack developer

Despre mine

I am a Rails developer with 3 years of experience and have also worked with Node.js, Vue.js, and React.

I attended Microverse bootcamp, where I learned full-stack development and built a LinkedIn bot that helped me connect with over 13,000 recruiters.

I have experience working with Docker and docker-compose and started deepening my knowledge of them two months ago.

I have worked as a solo developer but am open to collaborating with others in the future.

I recently worked part-time as a Rails developer but was laid off due to a slower work pace following brain tumour removal surgery.

I have experience with deploying Rails applications on VPS servers, though I find deployment one of the most challenging aspects of development.

Personal Background:

I am 39 years old, married, and have a 6-year-old son.

I have a background in dance, having performed professionally in Moldova, Romania, and China.

I used to practice Taekwondo (ages 16-20) but had to stop sparring due to brain surgery.

I have been recovering from brain tumour removal surgery, followed by radiotherapy and chemotherapy. I am still being evaluated yearly regarding my condition.

I take 500 mg of Keppra twice a day and sometimes find working with numbers and loop logic more challenging than before.

Current Goals & Interests:

I am currently looking for new work opportunities and ways to achieve financial independence.

I am exploring video content creation and have a YouTube channel where I discuss societal issues and deep philosophical topics.

I am also interested in AI, especially its potential in future space missions and local AI model training.

I am passionate about problem-solving, technology, and continuous learning.

Experiența profesională

Full-Stack Developer · TRAVOD · Chișinău
Iulie 2021 - Decembrie 2024 · 3 ani 6 luni

Skills

Front-End

Vue.js 2, jQuery, JavaScript, TypeScript, Next.js, SCSS, HTML5, CSS3

Back-End

Ruby on Rails (6 & 7), Ruby 3.2.2, Node.js, Express, REST APIs, PostgreSQL, MySQL

Tools & DevOps

Docker, Docker-Compose, Git, GitHub, CI/CD, RSpec, TDD, Heroku, Netlify

Languages

English (Fluent), Romanian (Native), Russian (Fluent), Mandarin (Basic), French (Basic)

Experience

Wordminds/Travod — Full-Stack Developer (Remote)

Aug. 2021 – Dec. 2024

Developed and maintained a Dockerized Rails 7 API with Vue 2 frontend.

Designed and optimized RESTful API endpoints, improving performance by 30%.

Implemented feature enhancements and resolved critical bugs, reducing production issues by 90%.

Wrote and maintained RSpec tests, ensuring 100% test coverage.

Integrated jQuery for legacy feature support and gradually migrated components to VueJS.

Managed Docker and docker-compose for local development and CI/CD pipelines.

Collaborated with cross-functional teams to deliver features on time.

Microverse — Technical Support Engineer (Remote)

Aug. 2020 – Aug. 2021

Reviewed real-world student projects, providing detailed feedback on code and best practices.

Assisted students with technical setup and debugging across multiple programming languages.

Collaborated with TSE leads to improve the code review process and maintain quality standards.
