Full-Stack Developer

Обо мне

Full-Stack Developer with extensive experience in building scalable web applications using TypeScript, Vue.js, React, and Node.js. Specializing in architecture, performance, and security of interfaces, as well as integrating development processes with DevOps. I value clarity, knowledge sharing, and sustainable solutions focused on the long-term success of the project.

Опыт работы

Full-Stack Developer · Sberbank Russia · Moscow

Сентябрь 2022 - Настоящее время · 3 года 3 месяца

1. Developed internal service interfaces using React and TypeScript with Redux Toolkit, React Query, and MUI.
2. Designed the overall architecture of frontend applications, standardizing approaches to state management, logging, and authentication.
3. Initiated the transition to a micro-frontend architecture, enabling independent development and deployment of modules.
4. Set up CI/CD pipelines on Jenkins and Bitbucket with automated deployment to SberCloud, accelerating releases and testing.
5. Implemented caching and render optimization, reducing interface load times by more than half.
6. Conducted code reviews and assisted junior developers in solving complex tasks.
7. Participated in demos and UX discussions, suggesting interface improvements.

Навыки: UX Collaboration, Code Review, Caching & Performance Optimization, CD, CI, SberCloud, Bitbucket, Jenkins, Micro-frontend Architecture, Node, MUI, React Query, Redux Toolkit, TypeScript, Js, Key Skills: React

Front-End Developer + DevOps Engineer ·

Telematica-One Group · Moscow

Март 2021 - Август 2022 · 1 год 6 месяцев

1. Developed a series of over 15 responsive web applications for T1-Group, enhancing efficiency and user experience in the transportation sector through innovative React-based UI/UX designs.

2. Implemented specialized logistics and transportation management features, including online tracking and route optimization, directly contributing to improved operational performance and customer satisfaction.
3. Optimized deployment and development workflows by enhancing CI/CD pipelines with GitLab, ensuring fast and efficient releases tailored to the dynamic logistics environment.

Навыки: Performance Optimization, Agile Development, CD, GitLab CI, Route Optimization, Logistics Systems, REST API, Responsive Web Apps, UX Design, UI, Node, Js, React
