Junior Frontend Developer

Despre mine

I am an enthusiastic junior frontend developer with a confident ability to solve problems that

appear in the way of development, which focuses on the quality of the product and with a

constant desire to learn new opportunities and technologies.

I have the qualities of being able to learn, being independent, and solving problems of any

complexity, as well as punctuality, good communication, and time management.

Being a member of your team would be an opportunity to participate in

numerous projects that help develop and promote products and activities of the company and a chance to realize my own potential.

- JavaScript, React.js, Redux Toolkit, HTML5,

CSS3, SCSS, Git, npm;

- TypeScript, Firebase.

Experiența profesională

Frontend Developer · Pet Project · Chișinău
Septembrie 2023 - Prezent · 2 ani 3 luni

I created my pet project (https://vermillion-choux-0e16bc.netlify.app/) to show what I can do

by combining all the instruments I know so far, which I will fix and update by adding new

technologies.

Here is the list of what has been done:

- Receiving data from the server (converting the received data into an array of products,

handling data loading and server-side errors);

- Filtering and sorting data;

- Pagination and receiving additional products;

- Product search by its name;

- Sign-up and log-in forms, creating user profiles via Firebase;

- The project was developed by using React.js and Redux Toolkit, and such libraries as React

Router Dom, Axios, Formik, Yup, React Slick, React Helmet, and lodash.debounce;

- Website layout from Figma and its styling through SCSS.

Studii: Medii de specialitate

National College of Commerce
