- Colaborare cu alte departamente
- Capacitatea de priotizare si

System Administrator

Despre mine

1)Experience with networking technologies (LAN/WAN, Routing, IPS, VPNs, VLANs, DHCP, DNS).

2)Strong knowledge of virtualization software, such as VMware and Microsoft Hyper-V.

3)Effective verbal and written communication skills, including active listening.

4)Knowledge of AD, RDS, GPO, Print Server, RADIUS, Hyper-V, Web Server, Apache.

5)Advanced experience with the Windows, Linux, Ubuntu, and macOS operating systems.

6)Experience in configuring and administering Mikrotik routers/switches.

7)Experience in managing corporate antivirus solutions (ESET, Kaspersky).

8)Experience in administering NVR systems and video servers, as well as installing and configuring surveillance cameras (Dahua, Tiandy, HikVision).

9)Scripting experience in Windows using PowerShell and Bash.

10)Experience with access control systems such as ZKTeco and HikVision Access Control.

11)Experience in managing office operations.

12)Experience in administering cloud solutions, such as Microsoft Azure and Google Cloud Platform (creating virtual machines, resource management, backups).

13)Experience in installing and maintaining 1C databases, including client-server connection and periodic backups (e.g., 1C:Enterprise 8.3).

14)Experience in administering databases such as Microsoft SQL Server and MySQL (installation, configuration, user administration, backup/restore, and permission management).

15)Experience in IT infrastructure monitoring using solutions such as Zabbix (alert configuration, resource monitoring – CPU, RAM, disk, uptime).

16)Administration and configuration of Postfix-based email servers (DNS configuration – SPF, DKIM, DMARC; anti-spam filters; log monitoring; email delivery troubleshooting).

17)Use and administration of Jira for project management, task tracking, and collaboration with technical teams.

Experiența profesională

System Administrator · TBC · Chișinău

organizare a task-urilor
- Atenție la Detalii
- Lucrul în Echipă
- Software Troubleshooting
- Network Troubleshooting
- Rezolvarea Problemelor
