# Developer

## Обо мне

Python Developer

Professional Summary

Aspiring Python Developer with a strong foundation in programming and a keen interest in learning and growing. Currently in 11th grade, I am passionate about software development, particularly in building scalable systems and working with data. I have hands-on experience with Python and am excited to expand my skills in cloud technologies, microservices, and DevOps.

Technical Skills

Programming Languages: Python, SQL (basic)

Frameworks & Libraries: Pandas (basic), PyArrow (basic)

Tools & Platforms: Git, Docker (beginner level)

Methodologies: Agile (learned through school projects)

Languages: English (Upper-Intermediate), Russian

Projects

Personal Python Projects

Developed a Python-based calculator and other small utilities to automate tasks.

Worked on data analysis projects using Pandas and basic SQL queries.

Experimented with Docker for containerization in small projects.

School Projects

Participated in school coding competitions and collaborative software development projects.

Created simple web applications using HTML, CSS, and Python for backend logic.

Education

11th Grade

Additional Training

Python Programming Fundamentals

Introduction to Cloud Computing (AWS)

Basic Data Analysis with Pandas

## Желаемая отрасль

- ИТ, Технологии
