Backend Developer

About me

Backend developer with over 4 years of experience in building reliable and scalable API services, Telegram bots, and database architectures. Confident in working with Python (FastAPI, Django), PostgreSQL, and Docker. I design backend applications from scratch — from database architecture and business logic to API structure. Experienced in production development, high-load systems, third-party integrations, and caching. I develop my own projects and focus on clean and maintainable code. Understanding Agile principles, familiar with Scrum and Kanban methodologies.

Work experience

Backend Developer / Founder · Books_base · Saint Petersburg
September 2021 - Present · 4 years 3 months

Project: Ecosystem for an e-book store — Telegram bot and website [booksbase.ru]

– Developed and launched a full-featured e-commerce system combining a Telegram bot and a website with a shared database and API

– Designed and built the backend architecture from scratch, including authentication, payments, discounts, notifications, and an admin panel

– Implemented asynchronous task processing with Celery and RabbitMQ (mailings, data updates, transaction handling)

– Set up containerization and deployment with Docker and Nginx, ensuring stable production performance

– Designed REST APIs using Django REST Framework for the web version and FastAPI for internal microservices

– Implemented the YooMoney payment system, caching (Redis), asynchronous notifications, and a fault-tolerant architecture in the Telegram bot

– The project runs stably in production and is actively used by real users

Skills: Python, Django, Django REST Framework, FastAPI, PostgreSQL, Redis, Celery, RabbitMQ, Docker, Nginx, Telegram Bots, Aiogram

- Backend
- Python
- FastAPI
- PostgreSQL
- Docker
- Pytest
- Aiogram
- SQLAlchemy
- Alembic
- Redis
- JavaScript
- Nodejs
- Telegram Bots
- API
- Git
- Linux

Telegram Developer · Temnomor · Tyumen
September 2023 - May 2025 · 1 year 8 months

Project: Telegram bot for college students (5,000+ users)
– Designed and developed a Telegram bot to deliver up-to-date class schedules to students
– Set up stable parsing using Playwright, ensuring reliability despite regular restrictions on the source website
– Implemented caching (Redis), a notification system, and a fault-tolerant architecture based on FastAPI
– Greatly increased user engagement through improved UX and system reliability
– Covered core logic with automated tests, optimized response time, and simplified maintenance

Skills: Python, FastAPI, PostgreSQL, Docker, Pytest, Aiogram, SQLAlchemy, Alembic, Redis, Telegram Bots

Desired industry

- IT, Tech

Education: Specialized secondary

Tyumen Industrial University — Multidisciplinary College
Graduated in: 2025
Speciality: Information Systems and Programming
