Developer

About me

I am a recent graduate of the ITI P. Henseberger College of Informatics in Italy, where I completed a five-year program that provided me with a solid foundation in IT. During my studies, I reached an advanced level in Italian and continued to deepen my knowledge of English, achieving a C2 level and obtaining certification for teaching.

After graduation, I gained valuable hands-on experience across various IT fields, ranging from SAP and ABAP development to web development, graphic design, and SEO. Some of my most relevant professional experiences include:

FIORI Developer / SAP S/4HANA Consultant at SYSCONS SRL, Milan (Apr. 2024 – Dec. 2024), where I contributed to the development and optimization of SAP applications.

Web Developer, Graphic Designer & SEO Specialist at I Dolci di Victoria, Sovico (Mar. 2022 – Mar. 2024), where I significantly enhanced the company's online presence through visual solutions and SEO strategies.

Support Technician (Troubleshooting) at AUDIO MODELING SRL, Macherio (Dec. 2022 – Feb. 2023), solving technical issues related to audio software.

Chip Tuning Specialist at ECUTUNED, Sovico (Dec. 2021 – Oct. 2022), working on software programming to optimize vehicle performance.

I am a dedicated, ambitious, and growth-oriented individual. I am known for my adaptability, organizational skills, and attention to detail, as well as for being a team player with strong communication abilities. I bring a proactive and creative approach to every task, always ready to face challenges and find effective solutions.

I am highly motivated to contribute to the success of your team's projects and am open to new opportunities.
