Full-Stack Developer (EN)

About me

Independent and reliable Full-Stack Web Developer with experience in development from idea to production: architecture, code, deployment and support. I specialize in PHP, Node.js, React and Next.js, with over 70 completed projects including custom systems, WordPress sites and Telegram bots. Proficient with databases, REST/GraphQL, WebSocket and server infrastructure (Nginx, Docker). I adapt quickly, actively use AI tools to speed up processes and offer solutions that make the product better.

Work experience

Full-stack PHP Developer · NDA Agreement · Chișinău

December 2024 - Present · 1 year 2 months

Task Description:

- Development of a website where WordPress was used as a headless CMS, and the visual part (frontend) was implemented on React.

Technologies:

- WordPress (REST API), React, Axios / Fetch, Custom Post Types, ACF, Vite, SCSS, Git

Features:

- Customizing WordPress as a headless CMS
- Creating custom data structure via ACF and CPT
- Development of frontend application on React with dynamic content loading via REST API
- Implementation of client routing (React Router) and interactive components
- Performance optimization: lazy loading, request caching
- Deploy and customize interaction between backend and frontend

Achievements:

- Managed to separate the visual part from the CMS, ensuring fast interface performance
- Increased flexibility of the project: it became easier to make changes to content and scale the frontend
