Dispatcher

About me

Motivated and detail-oriented aspiring Dispatcher with a strong passion for logistics and well-developed organizational skills. While I have a particular interest in car hauling, I am open to working in any dispatching department, including car hauling, step deck, dry van, flatbed, lowboy, and double drop. I'm eager to grow in the dispatch industry and contribute wherever I can bring value.

I've gained a clear understanding of dispatcher responsibilities by learning from acquaintances working in logistics and dispatch. Through personal interest and exploration, I developed a solid grasp of how the dispatching process works — including the principles of load search, communication with brokers, and basic route planning.

I'm familiar with key industry platforms such as Central Dispatch, Super Loadboard, and DAT, and I understand the process of evaluating load options and assigning them to drivers.

Took trading courses that strengthened my analytical thinking, decision-making, and time management — all of which are highly transferable to dispatching.

I am eager to join a company or fleet, ready to undergo training or an internship, and prepared to quickly transition into the full workflow. My calm approach under pressure, fast learning, and responsibility make me a valuable candidate for this role.

Desired industry

- Logistics / Transport
