Full-stack PHP Developer

About me

A responsible and proactive backend developer with more than 5 years of commercial PHP and Laravel development experience. I confidently create and maintain REST APIs, work with relational databases, and use modern approaches to application architecture and security. I always strive for clean, maintainable code and performance optimization.

I quickly learn new technologies and work effectively as a team. Result-oriented and continuous professional development. I am open to interesting tasks and growth in a dynamic team.

Professional skills:

- Experience working with PHP (5+ years): knowledge of the basic syntax and structure of the language, understanding PHP versions and code compatibility, and building a clean code architecture (DDD);

- Experience working with the Laravel framework (4+ years);

- Experience working with Vue.js / Nuxt3.js;

- Working with databases: basic knowledge of SQL, ability to work with MySQL;

- Working with REST API and JSON.

- Work with version control systems.

- Code optimization and performance management skills.

Work experience

PHP Developer · Alsodev · Chișinău
December 2019 - April 2025 · 5 years 5 months

Responsibilities:

-Development and support of the backend part of web applications using Laravel 8/9/10.

-Design and implementation of RESTful API for frontend and mobile clients.

-Database modeling and optimization (MySQL/PostgreSQL).

-Development of functionality according to the terms of reference and participation in its discussion.

-Integration of third-party services (payment systems, email/SMS gateways, OAuth, etc.).

-Implementation of queues, scheduled tasks, events and
