QA Engineer

About me

QA Engineer | Technical Specialist with 10+ Years of IT Experience

In my work, I have tested web and mobile applications, applied test design techniques in practice, and created test documentation, along with hands-on testing of physical hardware. I have hands-on experience with Postman, DevTools, Jira, SQL, Git and Android Studio. My strengths include high attention to detail, strong sense of responsibility, analytical and creative thinking, reasonable perfectionism, and the ability to work both independently and as part of a team.

Key skills:

• Testing: Solid understanding of SDLC/STLC, software testing methods and types. Practical skills in applying test design techniques (equivalence partitioning, boundary value analysis, pairwise testing, decision table testing, and state transition testing).

• Documentation: Requirements and user story analysis, test plans, checklists, test cases, and bug reports creation.

• Tools: Jira (tracked bugs and report issues), Postman (API testing, collections, variables, scripts), DevTools, Git, Figma, Android Studio.

• Basic knowledge of SQL, Python, HTML, CSS, Playwright (Automated API tests).

• Processes: Hands-on experience in Agile development cycles (requirements gathering, testing, review, retrospectives).

• Soft Skills: High attention to detail, analytical and creative thinking. Experience in process standardization and writing technical instructions.

Work experience

Computer systems engineer · CITRUS (Ukraine, Odessa) · Odessa, Ukraine

December 2016 - Present · 9 years 1 month

QA-related responsibilities:

• Worked within Agile methodology during the launch of new retail locations, participating in all key project stages:

- Requirements gathering and analysis in close collaboration with stakeholders

- Network design, budgeting, and hardware selection

- SDLC
- STLC
- Jira
- Postman
- DevTools
- Figma
- Android Studio
- Agile Methodology
- Analytical and creative thinking
- High attention to detail
- SQL
- Git
- Restful APIs
- JSON
- Python
- HTML
- CSS
- Playwright

- Testing and validation of technical solutions
- Deployment and commissioning of infrastructure
- Sprint reviews and retrospective discussions to continuously improve processes
• Performed testing of new hardware and software to ensure alignment with company requirements.
• Implemented standardized procedures for hardware setup and software installation, resulting in fewer errors and faster issue resolution.
• Maintained technical documentation (cross-connect logs, reports, instructions, etc.)
• Collaboration with related departments (programmers, system administrators, business analysts, etc.).
• Developed detailed setup guides for various hardware and software

Skills: Manual Testing

Desired industry

- IT, Tech

Education: Higher

Odessa Polytechnic National University
Graduated in: 2007
Faculty: Faculty of Information Computer Systems and Networks
Speciality: Specialist of computer systems and networks

Courses, trainings

QA
Graduated in 2025
Organizer: Binary Studio Academy

Stepik - Software testing. Theory + Practice
Graduated in 2025
