# Backend Developer PHP/Laravel

## About me

Backend developer with experience in building and supporting e-commerce and corporate platforms. Specialized in PHP/Laravel development. Focused on delivering efficient solutions for process automation, boosting online sales, and optimizing data workflows.

## Work experience

**Backend Web Developer (PHP + Laravel)** · WebIT  
· Chișinău

*November 2018 - July 2025 · 6 years 8 months*

Responsibilities:

- Development of web applications of varying complexity: e-commerce platforms (1C synchronization, product catalogs, filters, shopping cart, online payments, order management, user dashboards, promotions/discounts, etc.), corporate web solutions, real estate platforms (property catalogs, filters, map integrations, user dashboards), landing pages
  - Planning and implementing system architecture, building new functionality, and enhancing existing solutions
  - Developing and extending functionality, including additional modules within the CMS
  - Building user-friendly CMS solutions that allow clients to manage content independently
  - Integrating third-party APIs (payment systems, authentication/authorization, geolocation, analytics, CRM, etc.)
  - Working with ready-made layouts and adapting them to backend functionality
  - Participating in project planning, team development and collaboration with colleagues
- Achievements:
- Contributed to 70+ projects, including e-commerce, corporate systems, and landing pages
  - Improved business efficiency for clients by increasing online sales, automating workflows, reducing order processing time, boosting revenue, and strengthening market positions

- AJAX
- Git
- GitHub
- Composer
- LEMP (Ubuntu)
- SEO implementation
- Third-party API integrations
- Neuralworks

Skills: PHP, Laravel, MySQL, REST API, HTML5, CSS, JQuery, JavaScript, AJAX, GitHub, Git, Composer, SEO implementation, Third-party API integrations
