Software Engineer, WEB, PHP, JAVA

About me

Open to new projects, full-cycle development and technical leadership.

Looking for projects to build from scratch or to scale existing ones.

B2B or Employment contract.

Experienced Full-Stack Software Engineer and CTO with 6+ years in software development and technical leadership. Strong background in designing and building scalable web applications using Java and PHP, with hands-on expertise across the entire development lifecycle. Proven ability to lead engineering teams, define technical strategy, and deliver high-quality, maintainable solutions. Passionate about modern architectures, clean code, and driving innovation through technology.

Work experience

Software Engineer, PHP, JAVA · VPO IT Factory · Chişinău

February 2022 - Present · 3 years 10 months

Last Experience in VPO IT Factory:

Full-Stack Development: Java (Spring Boot), PHP, JavaScript

Architecture Design: Scalable microservices, event-driven architecture, REST APIs

Database Optimization: MySQL, PostgreSQL, Redis – query optimization and caching for high performance

Process Improvement: Implemented Agile workflows and DevOps practices to streamline releases

System Efficiency: Increased application performance and scalability through code refactoring and load balancing

Security & Compliance: Payment integrations, data encryption, and adherence to fintech security standards

Leadership: Managed cross-functional engineering team, introduced code review culture and automated testing

Skills: System Efficiency, Process Improvement, Team Leadership, Architecture Design, Full-Stack Development
