Logbook Coordinator

About me

I am an experienced specialist in managing and monitoring truck driver logs, and I have been working in this field for more than ten years. I have a strong understanding of the rules that regulate drivers' working hours and road safety. I can make quick decisions, prevent mistakes, and use the working time of drivers and dispatchers as efficiently as possible.

I have successful experience leading a team: I assign tasks, monitor the quality of work, and train employees. With more than six years of leadership experience, I have learned how to handle any situation — from complex cases involving split rest time to challenging inspections from regulatory authorities.

I have all the necessary skills for this field, including registering new drivers, working closely with dispatchers and the safety department, checking drivers before they start work, and handling complex document-related issues, especially in the western states.

I am familiar with a wide range of log-book and equipment systems, including Fortex, Magic, Qolyn for HOS247, as well as GPS Tab, RoadStar, and Motive (formerly KeepTruckin).
