Full Stack, JavaScript Developer

About me

I'm a Frontend Developer with more than 5 years of experience in building modern web applications, with a focus on performance, quality, and a pleasant user experience. I work daily with React, Next.js, TypeScript, React Query, Apollo/GraphQL, Tailwind, and shadcn/ui, creating clean, stable, and scalable interfaces.

I have a mature technical approach: I structure code clearly, think in a modular way, optimize data flows, and make sure every component is well-designed and easy to maintain. I pay attention to details, UX, and visual consistency of the product.

I like to work in a team and contribute with ideas that simplify processes, improve the product, and increase user satisfaction. I am oriented toward continuous learning and I actively develop my Backend skills — especially Node.js, Nest.js, SQL, Docker, and PostgreSQL — to have a complete perspective on the applications I work on.

Work experience

Full-Stack Developer · Freelance · Chișinău
August 2023 - Present · 2 years 6 months

Besides the projects developed for clients, I also build my own personal web projects, which include:
- web platforms with complex features
- solutions for events, education, and content management
- websites with authentication systems and admin dashboards
- online stores and presentation pages
- automations, SEO optimizations, and technical maintenance
- design, image editing, and visual materials

These personal projects allowed me to experiment with new technologies, optimize real processes, and understand deeply the full web development cycle: planning, design, implementation, testing, and publishing.

With personal auto

Front-End Developer · xCore · Chișinău
December 2024 - December 2025 · 1 year 1 month

- Developing the web interface using React / Next.js / TypeScript
- Creating reusable UI components and implementing designs according to specifications
- Integrating with REST APIs and managing data with React Query
- Optimizing application performance and reducing loading time
- Implementing responsive design for mobile and desktop
- Close collaboration with backend and design teams to deliver complete features
- Participating in code reviews and improving existing code
- Increasing product quality through constant testing and debugging

Skills: JavaScript, Next, Astro, UX, UI, GitHub, Git, REST API, TailwindCSS, CSS3, HTML5, TypeScript, React

Front-End Developer · EasyPlan · Chișinău
August 2022 - July 2023 · 11 months

I developed a complex web platform for managing the activity inside dental clinics. I implemented all UI components from scratch and created separate dashboards for doctors, reception, and the administrator.
Main features:
- interactive calendar for appointments, used by doctors and reception;
- patient treatment plan, with printing option;
- graphical view of the dentition, where problems and interventions can be marked directly in the interface;
- custom components and forms for managing patients, services, and payments.
Responsibilities:
- UI/UX design and implementation;
- creation of reusable components;
- integrating business logic for each role (doctor, reception, admin).

Skills: Figma, Next, React, React Redux, NestJS, Redux Toolkit, Tailwind

Front-End Developer · Febian IT · Chișinău
February 2022 - August 2022 · 7 months

At Febian IT, I had the opportunity to work on a project that was originally called "Kintent", and which is now named "TrustCloud". This project was an outsourcing project, and I used different technologies such as React.js, Reakit, Emotion, and others for its development.
The experience at TrustCloud helped me deepen my knowledge of these specific technologies and develop key skills in frontend development.

Skills: Next, React, JavaScript, HTML, CSS, Reakit, Redux, PostgreSQL

WEB Designer & Front-End Developer ·
Matematica.md & LiveClass.ro · Chișinău
September 2020 - January 2022 · 1 year 5 months

At Matematica.md and LiveClass.ro, I had the role of Web Designer and Frontend Developer. Especially at LiveClass.ro, an online real-time learning platform. I was responsible for working in web design and contributing to the frontend built with React.js. I learned Figma quickly to create designs, and with my previous knowledge in HTML, CSS, and basic JavaScript, I approached the React.js library easily. I also started working with TypeScript.

Skills: Next, React, Figma, JavaScript, HTML, CSS

Operator Designer & Website Administrator ·
Graf Poligraf · Chișinău
May 2018 - August 2020 · 2 years 4 months

At Graf Poligraf I worked as an operator designer, being involved in different printing projects, such as business cards, banners, flyers, and other promotional materials. My main responsibilities included creating and editing designs using applications like Photoshop, Illustrator, and Corel Draw.

Besides the operator designer role, I also managed the company website, built on WordPress.

Responsibilities:

- updating content, products, and images;

- publishing articles and promotions;

- visual and UX optimization of the pages.

Skills: JavaScript, HTML, CSS, PHP, WordPress, Figma

Desired industry

- IT, Tech

Education: Specialized secondary

CPB » Colegiul Politehnic din mun. Bălți
Graduated in: 2017
Speciality: Calculatoare
