# Fullstack Developer

## Despre mine

Hi! I'm a results-driven Fullstack Developer with a strong frontend focus and solid backend experience. I build fast, responsive, and maintainable web applications using Vue.js, React, Laravel, and Next.js. Whether it's crafting beautiful user interfaces or implementing robust API integrations, I bring projects to life with clean, production-ready code.

- Frontend: Vue 3 (Composition API, Pinia), React, Next.js, SCSS/Tailwind
- Backend: Laravel (PHP), Prisma, REST APIs, Auth systems
- Secure authentication, login/registration systems
- Reusable component libraries & form handling
- Chat systems, modals, file uploads, and dynamic dashboards
- WordPress customization & Elementor form work
- Pixel-perfect implementation from Figma/designs

I specialize in building modern apps that look great, load fast, and are easy to maintain. I understand how to balance form and function—making sure the UI is intuitive while the backend is reliable and scalable.

Clients appreciate my ability to communicate clearly, meet deadlines, and solve problems proactively. Whether you're a startup, agency, or product team, I'm ready to contribute with real value from day one.

## Experiența profesională
