Lead QA Engineer

Обо мне

QA Lead with 7+ years of experience in quality assurance, currently leading QA in a US logistics company developing mobile applications and CRM platforms for trucking carriers and fleet operators.

Strong expertise in cloud-based systems, mobile apps (Android/iOS), backend APIs, and complex business workflows. Deep understanding of US logistics domain, including carrier operations, compliance-driven features, and high-availability SaaS products. Proven ability to build scalable QA processes, lead teams, and ensure product quality in mission-critical systems.

Core Competencies

· QA Leadership & Quality Ownership

· US Logistics & Trucking Domain

· Mobile & CRM Testing

· Cloud & SaaS Testing

· Test Automation Architecture

· CI/CD & Shift-Left Testing

· API & Backend Testing

· Compliance-Critical Systems Testing

· Release Management

Testing & QA

· Test Strategy, Test Plans, Risk-Based Testing

· Functional, Regression, Smoke, E2E testing

· Exploratory Testing

· End-to-end testing of logistics workflows

· Defect Management & Root Cause Analysis

· Release readiness & quality gate

Key Achievements:

· Built and implemented a QA strategy from scratch for a US logistics SaaS platform, covering mobile apps (Android/iOS), CRM systems, and backend APIs

· Reduced production incidents by 35–45% by introducing risk-based testing, release quality gates, and CI/CD-integrated automated regression

· Designed and launched a scalable test automation framework (Python, Selenium, Appium, API), achieving 70%+ automation coverage of critical business workflows

· Established end-to-end testing for complex trucking workflows, including driver mobile apps CRM data synchronization, significantly reducing data inconsistency issues

· Led and mentored a QA team of up to 7 engineers, improving onboarding speed and overall quality ownership across teams

Опыт работы

QA Lead — Logistics & Trucking Solutions (US Market) · D42.tech · Кишинев
Декабрь 2022 - Настоящее время · 3 года 1 месяц

Logistics Company / SaaS Products:

- Leading QA for mobile applications and CRM systems for US trucking carriers

- Defining and executing QA strategy for logistics products

- Ensuring quality of mission-critical workflows for carriers and drivers

- Managing QA processes across web, mobile, and backend

- Building and maintaining automated test suites

- Integrating tests into CI/CD pipelines

- Collaborating with Product and Dev teams on requirements and acceptance criteria

- Improving product stability and reducing production issues

- Test strategy and planning: defining testing approaches (manual/automation), prioritizing scenarios, assessing risks and coverage, and selecting tools for web, mobile, and backend testing.

- QA team leadership: organizing QA work in agile processes (Scrum/Kanban), planning sprints and testing activities, breaking down tasks, and controlling deadlines and quality.

- Stakeholder communication: collaborating with product, development, and business teams, participating in grooming/planning/retrospectives, aligning quality criteria, and clearly communicating status and risks.

- Web and mobile testing: experience testing Android and iOS applications, using frameworks and tools such as Selenium/WebDriver/Selenoid, Appium, and others for functional, regression, and integration testing.

- Product-level quality ownership: implementing and tracking quality metrics (defect leakage, test coverage, release stability), analyzing production incidents, and improving processes through RCA and retrospectives.

- Mentoring and team development: onboarding new QA engineers, reviewing test documentation and automated tests, running internal workshops, and establishing common quality standards within the team.

- Documentation and analysis: creating and maintaining test plans, checklists, test cases, and test reports; working with issue-tracking and workflow systems such as Jira and Kaiten.

Навыки: System thinking and analytical skills, Deep understanding of testing processes and test automation, Strong stakeholder communication, Leadership and team management, Quality strategy and management

Senior QA Engineer (Cloud Products) · Reg.ru · Кишинев
Сентябрь 2018 - Декабрь 2022 · 4 года 3 месяца

Cloud & Distributed Systems Team:
- Tested cloud platforms and SaaS products
- Performed testing of distributed systems and microservices
- Validated system behavior under high load and scalability scenarios
- Conducted API and integration testing between services
- Verified monitoring, logging, and alerting setups
- Worked closely with DevOps on environments and deployments
- Ensured data integrity across cloud services
Testing & QA:
- Test Strategy, Test Plans, Risk-Based Testing
- Functional, Regression, Smoke, E2E testing
- Exploratory Testing
- Test Documentation (TestRail, Zephyr, Xray)
- Defect Management & RCA
Automation:
- Python (3.7–3.10)
- Selenium, WebDriver
- Mobile automation: Appium
- API automation: PyTest, Requests
- Selenoid, Selenium Grid
- BDD (basic): Gherkin

Навыки: Test Automation Architecture, CD, CI, Team Leadership, Quality Metrics, Test Analytics

Technical Support · Reg.ru · Кишинев
Май 2016 - Сентябрь 2019 · 3 года 5 месяцев

- Осуществлял клиентскую поддержку в области размещение и сопровождения web-приложений на хостинге.
- Помощь в написание клиентских скриптов
- Настройка web сервера
- Поддержка DNS сервера
- Мониторинг платформы в nagios

Желаемая отрасль

- ИТ, Технологии
