Lucrător, Internship IT

About me

Aspiring Software Engineer/Cybersecurity engineer with a strong foundation in programming and development, seeking a part time/student job, to apply my skills and gain practical experience. I'm proficient in various programming languages such as C and C# and committed to continuous learning and growth within the IT and IoT industry. I am just starting Cyber Security, but have proficiency in programming, having done programming in C/Assembly for a TTY based OS, as my current big project. I also have some experience in working with embedded systems such as arduino, raspberry pi pico, and STM32 board series, the latter of which I have applied in building an aerial mouse for easier interaction with my computer.

Desired industry

- Engineering

Education: Incomplete higher

Southern Denmark University

Currently studying

Faculty: Faculty of Engineering

Speciality: Software Engineering BSc

Courses, trainings

Information Technology Specialist

Graduated in 2024

Organizer: UTM Moldova

Masterclass in Java/Python/Kotlin for android

Graduated in 2020

Organizer: LearnProgramming Academy

👤 19 years

♂ Male

📍 Ialoveni
