# NodeJS developer

## Обо мне

Бэкэнд разработчик с более чем 6-ти летним стажем, Знания языка JavaScript, Node.js, TypeScript, знания фреймворков Nest.js, Express, знания по работе с SQL and NoSQL базами данных Postgres, MongoDB, MySQL, а также такие технологии как RabbitMQ, Docker, AWS services, Jenkins, работал с архитектурами Monolithic & Microservices

## Опыт работы

### NodeJS backend developer · Amdaris · Кишинев

Январь 2022 - Настоящее время · 3 года 11 месяцев

I developed an API from scratch for a web application that allows students to study various subjects, such as mathematics and literature, with features like exercises, tests, and examinations. I solely developed the backend for the application, taking full responsibility for its implementation. The team included two front-end developers and a tester, and I was responsible for coordinating the team to address common challenges. This role provided me with some experience in team leadership. <https://reviseonline.pearson.com/>

The second project involved developing a large-scale application for a major company to manage its employee hiring process. The backend was built on a microservices architecture with over 15 services. The project included more than five teams, each consisting of approximately 10 members. My role focused on implementing user stories as part of the development process. This project provided valuable experience in working with microservices architecture and message brokers.

Навыки: Node.js, TypeScript, Javascript, Nest.js, MongoDB, PostgreSQL, RabbitMQ, Docker

### NodeJS developer · Lohika · Одесса

Март 2021 - Декабрь 2021 · 10 месяцев

As part of a backend team, I worked on developing an API for a web and mobile application that allows employees to book available office resources, such as desks, rooms, parking spaces, and more. I was one of three backend developers, responsible

for implementing various user stories and contributing to approximately one-third of the overall development work.

Навыки: Node.js, JavaScript, TypeScript, NestJS, Express, MongoDB, Docker

## **NodeJS developer · XOVI · Одесса**

*Ноябрь 2019 - Февраль 2021 · 1 год 4 месяца*

I worked on Node.js projects focused on gathering keyword information to enhance website promotion for clients. I developed various parsers for platforms like Facebook and Google Search, grouped and processed the data, and sent it to different data warehouses. In essence, this was a form of ETL (Extract, Transform, Load) development. Additionally, I wrote unit and end-to-end (E2E) tests to ensure the quality and reliability of our product.

Навыки: Node.js, JavaScript, Puppeteer, Sails, MongoDB, PostgreSQL

## **NodeJS developer · SmartyAds · Одесса**

*Март 2019 - Июль 2019 · 5 месяцев*

I developed a high-load project focused on selling advertisements across various devices. The entire system was built around ETL processes. My responsibilities included organizing the code into logical domains, versioning the code in Git, implementing business logic rules, and addressing bugs reported by the support team.

Навыки: Node.js, Javascript, MySQL, MongoDB, Redis

## **Желаемая отрасль**

- ИТ, Технологии

## **Образование: Высшее**

**Одесский Национальный Университет им. Мечникова**

*Год окончания: 2006*

Факультет: Математики

Специальность: Математик, программист, экономист

## **Курсы, тренинги**

**Java**

*Год окончания 2015*

Организатор: Step Academy
