Front-End Developer

Despre mine

I am a skilled Front-end Developer with over 5 years of experience building responsive, dynamic web applications. I specialize in leveraging the power of Javascript and TypeScript, using modern frameworks like React and jQuery, alongside vanilla Javascript, to create seamless and engaging user experiences.

On the backend, my core expertise lies in PHP and its leading frameworks, Laravel and CakePHP, through which I have successfully built and maintained multiple projects. I am also proficient with Node.js and Express.js, having developed full-stack applications, although PHP remains my primary backend strength. I effectively manage databases using MySQL and MongoDB, and have practical experience with WebSockets for building real-time applications.

Beyond web development, I have created WebView Apps for Google Play with Android Studio and for Apple App Store with XStudio, showcasing versatility across both web and mobile platforms.

With a proven track record of delivering successful projects and a passion for embracing the latest technologies, I am eager to join your team and transform ideas into impactful digital solutions.

Experiența profesională

Full-Stack Developer · Internet Consulting · Chișinău

Ianuarie 2021 - Prezent · 4 ani 11 luni

As a seasoned Full Stack Developer, I specialize in full stack development using React, Express.js, jQuery, and PHP, with extensive experience in MongoDB, MySQL, UI/UX design, Mobile App Development, CMS integration, responsive web design, and API integration.

I've delivered diverse projects, including a feature-rich online Belot card game, where I implemented jQuery and React for the frontend, created custom UI components, and integrated complex animations. Additionally, I developed a full-stack app for generating verifiable random numbers for online card games using React, Express.js, and MongoDB.

In mobile development, I created a utility notification app deployed on Google Play, utilizing React, PHP, and MySQL. I also modernized a weather website, refactoring legacy PHP code and implementing responsive design.

- Syntactically Awesome Style Sheets (SASS)
- PHP
- JQuery
- ReactJS

Permis de conducere

Categoria: B

Cu automobil personal

My work includes government websites for Moldova, such as a Consumer Protection Site and Cultural Goods Registry, where I managed frontend development, CMS integration, and backend connectivity. I led the development of an e-learning platform, enhancing CMS functionality and backend systems.

I've also contributed to various corporate and news websites, including a React-based company site with a custom CMS, as well as refactoring a national news portal for responsiveness.
