Python Developer

About me

I'm a goal-oriented person who values both results and product quality. I'm deeply interested in development, current technologies, and programming trends. I graduated from college and dropped out of university to work and study more productively. I love clean, understandable code, interesting architectural approaches, and simple yet elegant solutions. I'm willing to learn something new, gradually learning frontend, Vue, and Nuxtjs so I can work more closely with the frontend team. I'm also delving into database management and can build end-to-end backend infrastructure, from server setup with firewall, web server, and Docker configurations to writing CI/CD pipelines for automated deployment.

I'd be happy to work in a friendly team that values not only results but also the quality of the work.

Work experience

Python Developer · Sirius Software · Chișinău
April 2025 - Present · 8 months

- Developing and maintaining backend services using FastAPI, Taskiq, Dishka, Aiogram
- Creating inter services communication infrastructure
- Writing automation scripts and improve architecture
Projects:
- http://sirius.expert - A project for financial management, automatic invoice generation with connection to invoices and banks

I was involved in developing core features of the product, as well as improving the architecture and refactoring old code.
siriusb2b.md
- http://siriusb2b.md - Analogue data aggregate data2b for all commercial companies in Moldova

I completely wrote the data collection backend, statistics and automation for data updates, as well as a search engine based on Postgres trigrams.

Skills: Clean Architecture, Taskiq, Dishka, Aiogram, Microservices, Redis, Postgres, SQLAlchemy, Fastapi, Python (Programming Language)

- Redis
- Postgres
- SQL
- Python (Programming Language)

Python Developer · Brainoza OU · Chişinău
January 2024 - March 2025 · 1 year 2 months

Developed a backend using FastAPI, built and deployed Telegram bots, and set up CI/CD pipelines and development environments. Actively contributed to the development and enhancement of a business product, ensuring scalability and performance.

Skills: Redis, PostgreSQL, SQLAlchemy, Fastapi, Python

System Engineer · Vr-dev team · Chişinău
July 2022 - December 2023 · 1 year 6 months

Provided first-line technical support, resolving customer issues efficiently. Developed automation scripts in Python and Bash to streamline processes. Worked with billing systems WHMCS and HostBill, optimizing workflows and system integrations.Provided first-line technical support, resolving customer issues efficiently. Developed automation scripts in Python and Bash to streamline processes. Worked with billing systems WHMCS and HostBill, optimizing workflows and system integrations.

Skills: Technical Support, Systems Integration, Systems Engineering

Desired industry

- IT, Tech

Education: Incomplete higher

UTM
Graduated in: 2025
