Front-End Developer (React)

About me

As a Frontend Developer, I focus on creating seamless and engaging user experiences, adapting to various challenges with flexibility. Technologies like React, React Native, Next.js, Angular are just tools I use to bring ideas to life, always aiming for intuitive and efficient solutions.

Work experience

TELEGRAM MINI APP · FREELANCE · Remote

August 2024 - Present · 1 year 4 months

Developed an engaging web-based game using React and Node.js, featuring gameplay inspired by rock-paper-scissors.

The application leverages Socket.IO for robust real-time communication, includes dedicated waiting rooms for players, integrates cryptocurrency payment solutions, and offers a host of additional innovative features.

Skills: Full Stack Development, React, Next.js

FULL STACK DEVELOPER · MAGIC SOLUTIONS · Remote

January 2022 - November 2023 · 1 year 11 months

OTPBANK: Developed a CRM system dedicated to managing consumer loans, streamlining processes for credit disbursement and monitoring.

MAIB: Designed and implemented custom components to enhance the functionality and user interface of internal applications.

UNIPREST: Created an admin panel for product management, enabling efficient control and real-time updating of essential product information.

Nexxon: Developed a React-based frontend that integrates CRM features, product management tools, and custom UI components into a single, user-friendly platform.

Sepsi, Miercurea Ciuc, Sfântul Gheorghe, Covasna: Developed a digital city portal featuring a news page and a
