Front-End Developer

About me

I am an experienced Front-End developer with extensive knowledge in developing user interfaces and creating dynamic web applications. I specialize in using HTML, CSS (SCSS), JavaScript, as well as frameworks and libraries such as React and Redux / Zustand. I have experience working with TypeScript and Next.js (including SSR, ISR and API Routes), as well as with databases via Prisma. I have skills in working with version control systems (Git), build tools (Webpack) and integration with RESTful APIs and databases. I understand the principles of UI/UX, have experience working with Figma

Work experience

Front-End Developer · Экосистема Альфа · Moscow

April 2025 - Present · 10 months

Developing and maintaining user interfaces using React and Next.js

Creating responsive and cross-browser layouts with CSS, Tailwind, and MUI
