Full-Stack Developer

About me

Full-stack developer with experience in creating web, desktop, and microservice applications. Specializing in API development, CRM integrations, parsing systems, and business process automation. Proficient in version control systems, cloud services, and containerization.

Technologies:

Backend: C# (WinForms, WPF, ASP.NET Core, EF Core), Java (Spring Boot), Python (Flask, FastAPI, Django), Node.js (Express), Php(Symfony, Laravel)

Frontend: HTML, CSS, JavaScript, TypeScript (Angular)

Databases: MsSQL, PostgreSQL, MySQL, SQLite

CRM Integrations: Bitrix24, AmoCRM

Infrastructure: Docker, Nginx, Ubuntu, Git

Additionally: web and API parsers, website data scraping, Telegram bot development.

Work experience

Full-Stack Developer · individual entrepreneur · Tiraspol

October 2022 - Present · 3 years 2 months

Programming of software products of any complexity in c#, java, python, php, node.js, angular, etc.

During this time, three products have been developed

1) Debt site parser written in node.js, and sending data to Bitrix24, while capturing data from the reputation API

2) Verification of Excel documents written in node.js. The program receives document data via API in the form of Base64 and back with error information+ recolors errors in the Excel file, and uses the My SQL database as a template for reconciliation

3) Getting data from AmoCRM to create requests in restaurants via API, the product is completely written in php.

Development a personal project, messenger

Asp.Net+Angular+Postgresql+nginx+docker, using signalR/Hub.

Skills: ASP, .NET, Angular, Telegram bot, PostgreSQL, MySQL, Microsoft SQL Server, Orm, Crm, Restful APIs, NodeJS, PHP (Programming Language), Python (Programming Language), C Sharp (Programming Language), Java (Programming Language), Docker, Git, Github, Gitlab

- MySql
- PostgreSql
- Angular (typescript)
- Ef Core
- Java
- Php
- Python
- Node
- Js
- Docker
- Nginx
- Git

Desired industry

- IT, Tech

Education: Higher
