Support Engineer

About me

I am a dedicated high school student at IPLT "Mihail Kogălniceanu" in Chișinău, where I consistently perform well academically. For the past 7 months, I have been training regularly at the gym, which has helped me build discipline, resilience, and confidence. I have also taken part in several volunteer activities, through which I developed teamwork skills and a sense of social responsibility.I am currently focused on learning Java, but I also have basic knowledge of C++ and HTML, including some of their fundamental features and syntax.

I hold a C1-level German language certificate, as well as the DSD I diploma (Deutsches Sprachdiplom, level A2–B1). I also have a B2 level in English and plan to continue my studies in preparation for the Cambridge English exam.
