Project Manager

About me

The manufacturing field became my natural choice due to family tradition: my parents worked in a factory, and I have been surrounded by a production environment since childhood. I started working in a factory right after finishing my studies and gradually delved deeper into this field, which remains my top priority to this day. My work not only provides my family's primary income but is also an integral part of my life.

From the beginning, I have aspired to leadership, whether in work, studies, sports, or even chess. Although success did not always come immediately, I continued to work diligently and strive for results. Throughout my development, I have cultivated several strong qualities that help me achieve my goals. I am responsible for results and confident in my objectives. Problem-solving and overcoming challenges are essential parts of my work process. I have a good understanding of the motivation and mood of those around me, which helps me manage a team effectively. Planning, both my work and that of my subordinates, is a key aspect of my approach. I believe in my work and the people involved in it. Moreover, I can make quick and decisive decisions without hesitation.

Love for my work has become my main ally in my manufacturing journey. I am convinced that involvement and passion for work are the key factors in achieving desired results.

Work experience

Incident Management Specialist · Moldindconbank
· Chișinău

February 2025 - Present · 10 months
