Software Engineer

Work experience

Software Engineer · IASIG ONLINE SRL · Chişinău
November 2020 - July 2025 · 4 years 8 months

iAsig

- Developed and maintained the iAsig web application, an online insurance platform for Moldova, focusing on creating a seamless and responsive user experience.
- Implemented complex real-time price calculations for various insurance products, optimizing the platform's ability to deliver dynamic pricing based on user input.
- Worked with React Hook Form to simplify and streamline form validation and submission processes across the platform.
- Developed the multi-language support feature (Russian, Romanian, English).
- Designed and implemented a modern, responsive layout using Tailwind CSS and Sass, ensuring optimal performance across both desktop and mobile devices.
- Set up CI/CD pipelines using GitHub Actions for automated deployment and build processes, improving development efficiency and reducing manual work.
- Developed the iAsig Dashboard for managing various types of insurance products and user data. Integrated Firebase Authentication for secure login options (Google, Apple, Email).
- Built a serverless backend using Firebase Functions, providing scalable backend services.
- Integrated external APIs, including mConnect, RCA, MAIB/MIA, and e-Facura Moldova.
- Developed automated PDF generation using Puppeteer and PDF-lib, and implemented multi-channel notifications via Slack, Telegram, and Email to keep users informed.

Skills: Attention to Detail, Adaptability, Ability to Multitask, Responsibility

Full Stack Software Developer · Labs Software SRL
 · Chişinău

May 2019 - November 2020 · 1 year 7 months

GoTenerife

- Collaborated within a team to develop a mobile application delivering a seamless user experience across both iOS and Android platforms.

- Utilized ReactJS for building the web-based dashboard, creating an intuitive and responsive interface for data management.
- Integrated Firebase Functions to manage back-end services, including real-time data processing, user authentication, and notifications, ensuring smooth interaction between the mobile app and back-end services.
- Collaborated closely with UX/UI designers and QA engineers to ensure that the app met user needs and quality standards.

Obit

- Developed the profile page for a memorial website, allowing users to create, view, and interact with personalized memorial pages for their loved ones.
- Implemented the Sign-up and Sign-in pages, providing a seamless and secure registration/login experience for users.
- Integrated Firebase Authentication to handle user authentication, enabling secure email/password-based sign-up and login functionality.
- Utilized Apollo GraphQL to optimize communication with the back-end, managing data fetching, mutations, and real-time updates across the application.

Labs42

- Developed the company website.

Skills: Responsibility, Receptivity, Adaptability, Teamwork

Desired industry

- IT, Tech
