Front-End Developer

About me

I am a passionate and dedicated Full Stack Web Developer with a strong interest in technology, and continuous learning. Over the past few years, I've worked on a variety of projects ranging from corporate web applications to mobile and university research projects, gaining solid experience across the full development cycle.

My main focus is on building modern, responsive, and high-performance web applications using React, TypeScript, Vite, PHP (Slim Framework), and Twig, while also having experience in C# (Xamarin.Forms and Unity) and database design (SQL, MySQL, SQLite).

Throughout my career, I've contributed to projects in aviation, government, logistics, education, and finance, taking part in architecture design, feature implementation, UI optimization, and full project deployment. I value clean architecture, maintainable code, and efficient teamwork.

I'm eager to keep growing in the IT field, particularly in web development, where I can apply my creativity and problem-solving skills to deliver high-quality digital products.
