Software Engineer, WEB, PHP, JAVA

About me

Open to new projects, full-cycle development and technical leadership.

Looking for projects to build from scratch or to scale existing ones.

B2B or Employment contract.

Experienced Full-Stack Software Engineer with 6+ years in software development. Strong background in designing and building scalable web applications using Java and PHP, with hands-on expertise across the entire development lifecycle. Proven ability to lead engineering teams, define technical strategy, and deliver high-quality, maintainable solutions. Passionate about modern architectures, clean code, and driving innovation through technology.

Work experience

Software Engineer, PHP, JAVA · VPO IT Factory · Chișinău
February 2022 - Present · 3 years 10 months

Last Experience in VPO IT Factory:

Full-Stack Development: Java (Spring Boot), PHP, JavaScript

Architecture Design: Scalable microservices, event-driven architecture, REST APIs

Database Optimization: MySQL, PostgreSQL, Redis – query optimization and caching for high performance

Process Improvement: Implemented Agile workflows and DevOps practices to streamline releases

System Efficiency: Increased application performance and scalability through code refactoring and load balancing

Security & Compliance: Payment integrations, data encryption, and adherence to fintech security standards

Leadership: Managed cross-functional engineering team, introduced code review culture and automated testing

Skills: System Efficiency, Process Improvement, Team Leadership, Architecture Design, Full-Stack Development

Driving licence

Category: B
With personal auto

PHP Developer · Quantox Technology · Chișinău
April 2022 - January 2023 · 10 months

Maintained backend logic for admin dashboards handling large amounts of data and traffic.

Optimized database queries, caching mechanisms (Redis, Memcached), and PHP code to reduce response times and handle peak loads efficiently.

Integrated third-party services and internal APIs to enhance admin panel functionality and automation.

Resolved complex backend issues, improving system reliability and reducing downtime.

Worked with job queues (RabbitMQ, Redis queues) to handle asynchronous tasks efficiently.

Helped maintain uptime and reliability for mission-critical admin panels by optimizing backend processes and reducing bottlenecks.

Skills: Designed and developed scalable web applications using PHP and MySQL

PHP Developer · Intelligent Contacts · Chișinău
June 2018 - June 2021 · 3 years 1 month

PHP and JavaScript.

Developed OAuth and SSO authentication systems from scratch.

Improved database queries and API response times, making applications faster and more efficient.

Created and integrated RESTful APIs to connect different services and improve data flow.

Cleaned up and modernized old code to make it more readable, maintainable, and efficient.

Skills: And jQuery, Laravel, Developed dynamic web applications using PHP

Desired industry

- IT, Tech

Education: Higher

Moldova State University
Graduated in: 2015
Faculty: Faculty of Mathematics and Computer Science
