UI/UX Designer

About me

I am a highly experienced Web Designer with over 20 years of professional tenure in the industry. My background includes working with several world-famous companies, which has equipped me with a deep understanding of corporate standards and large-scale project execution.

In parallel, I have cultivated a robust 18-year freelance career, initiating my journey on TemplateMonster. My market authority is validated by successful accounts on ThemeForest, including PowerElite and Elite statuses, and a comprehensive, up-to-date portfolio on UpWork.

I also have substantial experience in mentoring and developing junior designers. Specifically, over 10 specialists working within my ThemeForest team successfully achieved professional status (became Pros) while I managed them on UpWork.

I actively integrate cutting-edge Artificial Intelligence tools (such as Fima Make, Notebook LM, Gemini, Nano Banana, Lovable, Claude, and others) into my workflow. This commitment ensures I remain current with the latest industry trends, enabling me to handle tasks of any complexity and deliver client solutions that maintain relevance for years to come.

Work experience
